

1. Full Name - **Shriya Nulkar**

2. Batch Details - Passed out of Std. 10th in the year 2013

3. Current Profession/Designation - Artist: owner of a small business

4. Key Achievements - I completed my post graduation in Clinical Psychology and was working in the field of alternative education when I realised that my hobby (drawing, painting, craft) is gaining more attention than my (then) current profession. So I took a bold decision to leave my job and completely

focus on transforming my hobby into a business. Today, I have set up a small art studio where I create art. I have launched over 50 different art products and run this little art business single-handedly. I paint walls too! Financially, I think it was the best decision to leave my job and start a business.

5. A brief message reflecting on how SPM English School contributed to shaping your journey -

Through my schooling years, my teachers at SPM always supported my unique interests. They focused on individual likings and inclinations instead of collective interests which I think is really important in schooling years. I am really grateful to my teachers for being so encouraging and for motivating us to do what we like and do the best in that field. Instead of being a 'Jack of all and master of none', my teachers allowed me to take my sweet time in finding my real interests but they insisted that I become the best version of myself in that particular field. Mediocrity is not an option. I will always remember their advices, suggestions and teachings as they are embedded in my brain forever!

Warm Regards,

Shriya Nulkar
